RESPONSIVE DESIGN.

EJERCICIO 1

Lee el tema y en crea la estructura de ejemplo que he utilizado para explicar todo el contenido. La primera versión esta en e la sección Fluid Layout donde encontraréis el html que tenéis que utilizar. Además hay mucho código css que podéis utiliza.
El objetivo es que la web se vaya adaptando a la pantalla como os muestro en la diferentes imágenes.
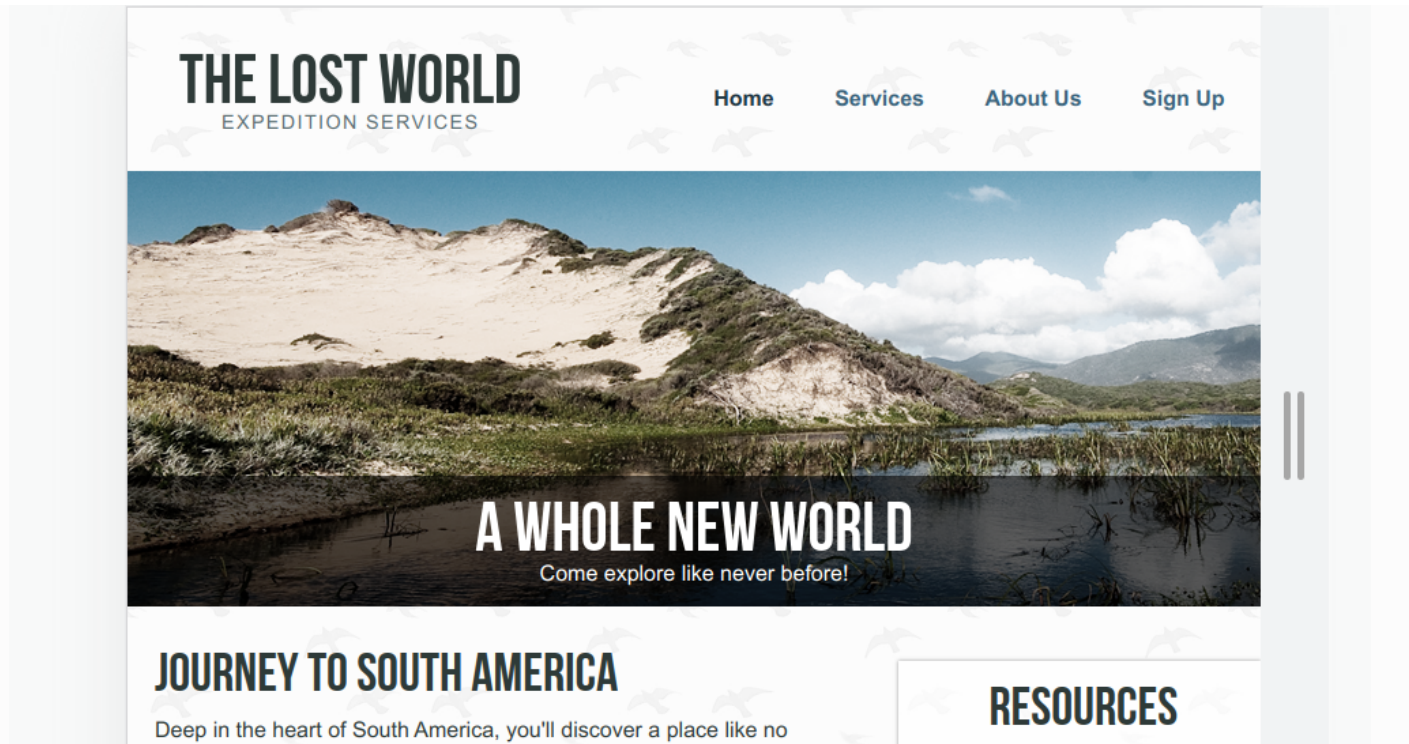

Construido con

- Semantic HTML5
- CSS custom properties
- Flexbox
- Grid

Ejercicio 2

A partir de la web de la **Actividad 4 del tema 2**, the lost word, crea los siguiente breakpoints para que se vaya mostrando de la siguiente manera:

Primera modificación (800px):

Segunda modificación (720px):

JOURNEY TO SOUTH AMERICA

Deep in the heart of South America, you'll discover a place like no other in the world. Dinosaurs roam free, and you'll be able to journey alongside **Iguanodons**, **Stegosauruses**, **Allosauruses**, **Megalosaurues**, and all of the greatest creatures inhabiting the land. Don't be afraid, though. You'll have a team of trained professionals guiding you through the treacherous wilderness.

Amidst the vast landscape of South America lie several of our secured camp sites. These camp sites are optimally located for the viewing of the dinosaurs that inhabit the region. We use **Jeep Terraine Vehicles** as transport to and from the camp sites, as well as traveling by foot to the closer camp sites. If you've never hiked or camped before, we offer introductory classes that will get you prepared, in addition to the mandatory orientation for all participants.

If you want to arrive at the central camp site in style, we offer a **Skydiving Package** for those who are adventurous enough to arrive this way. We'll take you from the airport in the skydiving plane, where you'll get to parachute out and land right at the central camp site. Don't worry, if you aren't into jumping out a plane to arrive at your destination, we'll take you by vehicle to the central camp site.
